

Please submit a brief, one page summary of the health care management topic for your final paper. Your paper should include:

1. Problem / Issue Statement--what is the thesis for your essay (the problem that you aim to address). Be specific.
2. Literature review. Identify 2-3 relevant academic journal articles that will support your essay. Summarize the key points as background on your topic. Include citations in APA format. (No other articles for your final paper. This is a writing project only).
