

**SCI 100 Module Seven Activity Guidelines and Rubric  
Scientific Understanding**

**Prompt:** Your third and final project in this course, which is due in the next module, is a presentation. In this assignment, you'll practice putting together a slide that could be used in a presentation, using software such as Prezi or PowerPoint.

For this activity, **create at least one slide** that answers the following questions:

1. How do you benefit from understanding the science behind your chosen topic? How might others benefit from also having this understanding?
2. Think back to the question you posed in Project 2. How might other people be affected if that question were answered?

You're encouraged to include graphics to make the slide (or slides) more eye-catching.

**Presentation Support:** If you need help using presentation software, check out some or all of the following resources:

[PowerPoint for Windows Training](#): The Microsoft website has general tutorials for using PowerPoint.

[Training for Different Versions of PowerPoint](#): The Atomic Learning/Hoonuit website has tutorials for different versions of PowerPoint.

[Prezi Support Center](#): The Prezi Support Center explains how to use different Prezi tools.
