Part 1:
Start by reading these TWO short articles:
Article #1 of 2: https://www.newscientist.com/article/2117954-gadget-boom-sees-e-waste-in-asia-spike-63-per-cent-in-5-years/ (Links to an external site.)

Article #2 of 2: https://green.harvard.edu/news/lecture-e-waste (Links to an external site.)

Then answer these questions. Please copy & paste the questions AND answers directly into the submission folder OR you can copy/paste into a word document, then upload.
#1: What is eWaste?

#2: Think back on your own personal electronic purchasing habits. How often do you buy a new piece of electronic equipment or new phone? Give a few sentences justification for this frequency (there is no right or wrong answer, just an exploration of our habits).

#3: What would it take for you to change your electronic purchasing habits? Be specific.

Part 2:
Think back to our lecture on ethics and our assignment on eWaste in this module. Using this information, discuss your ideas on the ethics of eWaste below.

You must post one statement about your thoughts (a minimum of 200 words) You may use/link any information from our reading or other reputable resources you find to support your opinion.

Finish each parts in 2 documents.
